

PULASTIC® TO PULASTIC® (P2P)
OUR SUSTAINABLE AND
DURABLE CONTRIBUTION FOR A
BETTER WORLD FOR TODAY AND
OUR FUTURE GENERATIONS

PULASTIC®
SPORTS FLOORING

A SIKA BRAND

NOT ONLY THE BASIS FOR PULASTIC MULTI-PURPOSE SPORTS FLOOR SYSTEMS, BUT OUR CONTRIBUTION TO MAKING THE WORLD A BETTER PLACE

THE TRUSTED PULASTIC® QUALITY TAKEN TO THE NEXT LEVEL

All Pulastic sports floors traditionally come with an elastic layer that is composed of 100% recycled tires.

Now we have taken recycling and circularity to the next level; we have started to recycle our beloved Pulastic sports floors. When, after a typical life span of 25+ years, a Pulastic floor is demolished, we regranulate 100% of the sports floor demolition waste and reproduce the next-gen elastic layer with it again. We proudly call it "Pulastic-2-Pulastic" or in brief "P2P". In the near future we will provide this as a standard solution for all our sports floors.

THE ADVANTAGES OF PULASTIC® TO PULASTIC®

- 100% re-use of previous generations of Pulastic sports floors
- Excellent long term resiliency for comfort and injury prevention
- Multi-sports & multi-purpose, so high flexibility and favourable ROI
- Compliant with European Building Decree / EN 14904
- Contributes to meeting the requirements for indoor air quality / emission. Tested and proven to meet the requirements of Eurofins Indoor Air Quality Gold-standards (comprises AgBB, M1 and other international standards for indoor air quality).
- Pulastic sports floors with a Regupol shockpad have been applied in a very

wide variety of projects; 50 years of joint experience in sports floors!

- Sika Netherlands is VCA** certified for job site safety, and works according to the Responsible Care/EQHS management system BS OHSAS 18001
- Pulastic® sport floors are manufactured under ISO 9001 for quality management, ISO 14001 for environmental care. Sika Netherlands is a Level 3 certified company according to the CSR Performance Ladder. These standards are inspired by ISO 26000 for corporate sustainability.

SEAMLESS CONSTRUCTION FOR THE LONG TERM

A Pulastic® sport floor system range is composed as follows:

- A special pre-fabricated Pulastic-2-Pulastic rubber shock pad. The thickness depends on the final requirements and level of comfort versus multi-purpose use
- The P2P shockpad is bonded to the subfloor with solvent free adhesive
- Porefiller and structural self-levelling polyurethane layers are applied
- A matt water-based sealcoat finishes the floor
- Court marking with durable waterbased linepaint
